LEXI TRANSLATE
Your pathway to global communication

LEXI Translate is an automatic translation solution that effortlessly expands the global reach of your broadcasts, live events, conferences, religious services, and more.

Leveraging the success of LEXI automatic captioning and offering support for dozens of languages, LEXI Translate overcomes language barriers and ensures worldwide accessibility. LEXI Translate is an excellent choice for extending audience reach and ensuring seamless communication across languages

BENEFITS

✓ **Global Accessibility**

Overcome geographic and cultural barriers with our seamless automatic translation and display of subtitles, covering over 130 major languages.

✓ **Expanded Audience Reach**

Reach a wider audience by providing multilingual subtitles, enhancing accessibility and engagement across diverse demographics.

✓ **New: Live Text-To-Speech Dubbing**

In addition to providing multilingual text subtitles, Lexi Translate can use high quality AI voices to create a live audio track speaking the destination language for incorporation into your video programs.

✓ **Seamless Integration**

LEXI Translate integrates seamlessly with iCap compatible captioning systems, including SDI encoder, Alta virtualized IP video encoders, & Falcon streaming service.

✓ **Cost Effective**

Affordable per-hour rates with no monthly minimum, allowing content creators to leverage multilingual subtitles for any volume of live content.
