LEXI VOICE

AI VOICE TRANSLATION

Expand Global Reach and Boost Revenue streams with LEXI Voice

LEXI Voice empowers broadcasters and content creators to expand their global reach and unlock new revenue streams by delivering content in multiple languages, in real time. This cutting-edge AI solution enables effortless, low-latency voice translation, driving audience engagement and increasing viewership across new markets.

Break Language Barriers with Real-Time Translation

Whether hosting a global event or broadcasting to a diverse audience,
LEXI Voice delivers fast, high-quality voice translations that keep conversations flowing smoothly.

Global Reach and Engagement
Expand your audience by delivering content in their language, enhancing connection

Boost Revenue
Increase revenue streams by opening new markets for your content

Real-time translation
Instantly translate a single voice stream into multiple languages as the conversation unfolds.

Natural Sounding Voices
Match speaker tone, style and speed across different languages for a natural, engaging experience.

Low latency
Experience near-instant translation with minimal delay—perfect for live events and real-time communication.

Seamless Integration
Deliverable over the existing iCap network to AI-Media/EEG caption encoders with no new equipment, networking, or cloud access required

Trusted Partnerships
Powered by leading AI technology through partnerships with Google and ElevenLabs for enhanced accuracy and natural voice quality.

Broadcast Ready
Easily embed into video production and broadcast chains using SDI, 2110, or compressed IP video.
